

LAWRENCEBURG UTILITY SYSTEMS

Electrical Safety for Kids

Lawrenceburg Utility Systems would be glad to do an electrical presentation for your students. The presentation usually lasts one hour but can be adjusted to your classroom needs.

Safety Model Demonstration

THE BIG DONT'S

- **Don't** put fingers or objects into an electrical outlet, toaster, or any other appliance, even if it's off.
- **Don't** use appliances - and appliance cords - near bathtubs and sinks.

- **Don't** climb trees near power lines.
- **Don't** fly kites or balloons around power lines. Electricity can travel down the strings of kites or balloons that become tangled in power lines and can cause fire or electrical shock.
- **Don't** ever try to remove anything from a power line. If you see something stuck in a power line, call Lawrenceburg Utility Systems:

Lawrenceburg Utility Systems	Emergency
(931) 762-7161 24 hrs/ 7 days a week	911

THE BIG DOs

- **Do** use plug covers in outlets.
- **Do** use balloons or kites in open areas only, away from overhead lines. Keep metallic balloons indoors, as they are highly conductive.
- **Do** tell an adult to call Lawrenceburg Utility Systems if a toy gets into power lines or a substation. Never retrieve the toy yourself. An adult should call Lawrenceburg Utility Systems to remove the toy.
- **Do** stay away from places where you see "**Danger - High Voltage,**" "**Warning - High Voltage,**" and "**Caution - High Voltage**" signs.
- **Do** stay away from power lines, substations, and pad-mounted transformers, which look like short metal storage cabinets on concrete slabs.

Lawrenceburg Utility Systems wants you to be safe while working or playing around Electricity and Power Lines!

Other Safety topics that Lawrenceburg Utility Systems would be glad to present to your class or group are listed below!

***Natural Gas and Pipeline Safety
Safe Drinking Water
Waste Water Treatment***
